Section 1. Purpose and Findings.

(a) The Planning Department has determined that the actions contemplated in this Ordinance are in compliance with the California Environmental Quality Act (California Public Resources Code sections 21000 et seq.). Said determination is on file with the Clerk of the Board of Supervisors in File No. ______________ and is incorporated herein by reference.

(ba) In fiscal year 2008-2009, the Department of Public Works, Recreation and Parks Department, Port of San Francisco, Municipal Transportation Agency of the City and County of San Francisco...
San Francisco collectively spent in excess of $44,000,000-$24,792,558 removing litter from the sidewalks, gutters and outdoor public spaces of San Francisco.

(sb) According to the 2009 audit of the composition of street and sidewalk litter conducted by MGM Management, cigarette butts and related packaging litter constitute 25% of all such litter thereby accounting for nearly $11,000,000-$6,098,969 of the City’s annual litter removal costs.

(sc) In 2009, Health Economics Consulting Group conducted a report on the cost of tobacco cigarette litter to the City of San Francisco and calculated a maximum permissible fee per pack of cigarettes that offsets to offset the City’s costs of abating tobacco cigarette litter abatement costs. The report is on file with the Clerk of the Board of Supervisors in File No. 099724 and is incorporated herein by reference. It concludes that a fee of up to $.033-.22 per pack of cigarettes sold in San Francisco may be imposed to offset the City’s tobacco cigarette litter abatement costs.

(sd) In addition to the aesthetic degradation that results from litter generally, cigarette litter uniquely damages the environment. The smoked filter and leftover tobacco from smoked cigarettes butts contain a variety of toxic organic compounds and heavy metals that can cause toxicity in the marine environment. Standard Acute Aquatic Toxicity tests conducted by Dr. Richard Gersberg, Ph.D. at San Diego State University have determined that the Lethal Concentration that kills 50% of both freshwater Flat Head Minnows and saltwater Smelt in a 96 hour period (commonly referred to as the LC50) occurs in a solution of just one smoked cigarette butt in approximately a one liter bucket of water.

(se) This Ordinance establishes the Cigarette Litter Abatement Fee that will provide revenue to mitigate the City’s annual costs of abating the nuisance that cigarette butts and other cigarette related litter causes.

(sf) Imposing a litter impact fee directly on the cigarette purchaser at the point of sale for each pack of cigarettes sold in the City at the point of sale is the most practical and equitable.
revenue mechanism to recover the public expense required to abate cigarette litter. The fee is imposed at the point of sale in order to collect the litter impact fee directly from the purchaser.

The Cigarette Litter Abatement Fee will also mitigate support public efforts to curb improper cigarette litter disposal behavior by funding anti-cigarette litter education, and will provide the revenue required to administer this Ordinance, including but not limited to, costs for collecting, processing the fees and process and enforcing compliance with the Cigarette Litter Abatement Fees requirement.
