Overview of SFO

Land Use
- 5,200 acres total area
- 2,700 acres (Operational use)
- 2,500 acres (Natural tidelands and undeveloped land)

CY 2019
- 57.6 Million Annual Passengers
- >13,000,000 sf facilities
- 54 airlines

United’s Maintenance Base

Mel Leong Treatment Plant
- Sanitary Treatment Plant (SAN) - 1.2 MGD
- Industrial Treatment Plant (IW) - 1.2 MGD
SFO IPM Program Elements & Footprint

Integrated Pest Management

What is Integrated Pest Management?
San Francisco International Airport is part of the City/County of San Francisco which values its communities and the people within those communities which is how Pest Management came to be in 1996 with a landmark vote to initiate an Integrated Pest Management Ordinance. Integrated Pest Management (IPM) is a common sense approach that provides an effective species management framework. IPM practices reduced dependency upon toxic pesticides, subsequently mitigating exposure to these hazardous chemicals. IPM, when practiced proficiently, is truly a method of ecosystem stewardship that combines cultural, physical and biological methods to keep the populations of undesirable species in balance at tolerable levels. Ideally, IPM involves using chemical control methods only as a last resort and when used, incorporating the least-toxic control method available after exhausting all possible alternatives.

Service Areas
- Terminals
- Food and Retail Spaces
- Common Areas

- Airfield
- Roadways
SFO IPM Continued Growth! - Outreach and Compliance

February 2018 = 21 SFO IPM tenants, 7 other companies

August 2019 = 49 SFO IPM tenants

Phase I
Governance
Policy – Rules & Regulations

Phase II
Food & Retail
Concessions

Phase III
Lounges, Airlines,
Service Providers

DATE: September 29, 2020
TO: All Aviation Tenants
MEMORANDUM SUBJECT: Integrated Pest Management Ordinance

Background
The Airport’s lease terms and Rule 8.11 of the Airport Rules and Regulations require tenants to comply with the City and County of San Francisco’s Integrated Pest Management (“IPM”) Ordinance. The IPM Ordinance restricts pesticides that can be used at the Airport to those on the San Francisco Reduced Risk Pesticide List (attached), and, if used, they must be properly reported on a monthly basis to the City of San Francisco, Department of Environment. In order to comply with the IPM Ordinance, the Airport will support tenants to ensure they are using a Pest Service Provider that can support compliance with the Ordinance.

Action
1. Please fill out this SURVEY by November 3rd to let the Airport know which pest service provider you are working with, if at all.
2. Determine if your current Pest Service Provider is able to meet the ordnance requirements:
   - Restricts pesticide usage (if necessary) to those on the City of SF list (attached)
   - Report pesticide usage on a monthly basis to the City of San Francisco Department of the Environment through an online reporting software.
3. If your provider is not able to meet requirements, please switch to a provider that is able to:
   - In selecting a provider, look out for one of the third-party certifications below – these certifications ensure only approved pesticides are used (when required):
     - EcoWise Certified IPM Professionals for Buildings (for California)
     - Green Shield Certified IPM Professionals for Buildings (nationwide)
     - Greenpro Certified (nationwide). Make sure to specify a Greenpro service in your contract.
   *For a list of local certified providers or if you have questions please reach out to SFOem: Ops@flysfo.com.
4. Include monthly pesticide use data reporting as a requirement in your IPM contracts (each month’s report to be submitted by the end of the following month) and inform companies of training sessions with SF Department of the Environment on using reporting software – dates to be announced.
