Coordinator Diedre Tanenberg (and Sup. Ronen),

Dear Commission on the Environment, Supervisor and Mayor,

I strongly support increasing staffing for the Department of the Environment, and the 1% for Climate Equity campaign which asks for at least an additional 1% of San Francisco's budget-- around \$125 million per year-- be committed to a down payment on the response needed for the climate emergency.

I am thrilled that on February 7, the Commission on Environment expressed their strong support for these two budget commitments as well. We cannot do the urgent work called for by SF's Climate Action Plan if we are unwilling to commit General Fund revenue to climate programs.

I also applaud the Commission on Environment for their plan to reach out and encourage Commissions of other Departments to add a focus on additional equitable climate action in their budget request.

It is urgent that we fund much-needed programs in electrification, transportation mode shift, just transition, and climate justice, and these are multi-departmental tasks!

We can't avert climate disaster without immediate action. We need real and increased funding to deal with this emergency.

Thank you.

Matt Carona
