**\*ADC**, or “Alternative Daily Cover,” refers to cover material other than earthen material placed on the surface of the active face of a municipal solid waste landfill at the end of each operating day to control vectors, fires, odors, blowing litter, and scavenging. The Leadership in Energy and Environmental Design (LEED) certification disqualifies ADC as material recovery. For LEED projects, please refer to the facility’s “Recovery Rate without ADC” for the material recovery rate that Green Halo will use for weight tickets issued by that facility.

**IMPORTANT NOTE:** The City and County of San Francisco monitors and verifies material recovery rates are verified by a Qualified Third-Party Verifier (i.e., recycling and/or diversion rates) for all listed facilities.

Call (415) 355-3799 or email [DebrisRecovery@sfgov.org](mailto:DebrisRecovery@sfgov.org) to verify a facility’s recovery rate.

Visit <http://www.sf.wastetracking.com/> to create a construction Material Reduction and Recovery Plan (MRRP) using up-to-date 3<sup>rd</sup>-party verified recovery rates.
