---

---

---

4. Name two types of plants—besides trees—that we can use to make tree-free paper.

---

---

---

5. Why are trees important to you?

---

---

---

Student Fact Sheet A-3  
**Trees Please**

**Answers:**

1. What percentage of all species living on land makes their homes in trees and forests?

90%.

2. What do trees turn carbon dioxide into? Why is this important to us?

Oxygen. It gives us air to breathe.

3. Name three different foods that come from trees.

Apples, peaches, plums, almonds, chocolate, cinnamon, nutmeg, pepper and maple syrup.

4. Name two types of plants—besides trees—that we can use to make tree-free paper.

Kenaf, hemp, sugarcane, cotton, corn stalks, wheat straw.

5. Why are trees important to you?

Home or habitat to animals, help us breathe, food, help stop global warming, pretty to look at, shade.
