Across

- 1 A person who teaches students.
- 4 Small red bug with black spots that eats insect pests in the garden.
- 5 When this blows, it turns windmills and can power our homes with clean energy.
- 9 If we turn this off when brushing our teeth, it can help save water.
- 12 The "Fourth R" that means we compost our food scraps.
- 13 Comes from dinosaur fossils and is used to fuel cars, and factories. Burning this creates air pollution.
- 15 The "Second R" that means we use something over and over again.
- 16 The part of the orange that we can't eat but we can compost.
- 17 Nutrient rich fertilizer that helps plants grow. We make this when we throw food scraps into the green cart.
- 18 What we eat to survive
- 19 A shining star that can give us clean energy called *solar power*.
- 20 These types of food grow on a farm or in a garden and are very healthy for us to eat.
- 23 Something we write on made from trees that can also be made from tree-free plants, corn stalks and wheat straw.
- 24 The "Third R" that means we make something new out of something old.
- 25 A place where we learn.
- 26 The force of these flowing in and out under the Golden Gate Bridge can make enough energy to power the entire city of San Francisco. These are also controlled by the pull of the moon on the earth.
- 27 A wiggling creature that lives in the dirt or in compost piles and eats our food scraps.
- 28 A sweet and healthy type of food that usually grows on trees and is full of vitamins.

Down

- 2 Living things like elephants and eagles that depend on nature and in order to survive.
- 3 The "First R" that means we use less of something.
- 4 Another name for a dump where we take trash that we didn't reuse, recycle or compost.
- 5 This is something all living things need to survive and can be found in oceans, lakes, rivers and streams.
- 6 Playful and really smart mammals that do flips and swim in our ocean.
- 7 Big, orange, magical bird that reminds us we have the power to transform our home, our city and our planet.
- 8 Recycling this type of metal from soda cans is easy to do and can help save the rainforests.
- 10 These provide food and shelter for animals. They make oxygen, give shade and keep the planet cool.
- 11 If this gets polluted it can make it hard for us to breathe.
- 14 A California city by the bay.
- 21 The color of the special cart in San Francisco where we can compost all food scraps.
- 22 You can recycle this cardboard container that cereal comes in.
