**San Francisco Environment Code Chapter 22, Sections 2200 through 2219**

The San Francisco Safe Drug Disposal Stewardship Ordinance (Ordinance) was signed by Mayor Ed Lee on March 26, 2015 and became effective on April 25, 2015. The Ordinance requires medicine manufacturers that sell their products in San Francisco to provide all San Francisco residents with a safe and convenient way to dispose of their unwanted home-generated medicine.

Inmar is one of two product stewardship organizations that the Environment Department (Department) has approved to operate a medicine collection program in San Francisco on behalf of medicine manufacturers. Inmar submitted a revised initial Product Stewardship Plan on October 13, 2020, that was approved by the Director of the Department with conditions on November 25, 2020.

The April 22, 2023 Product Stewardship Plan currently under review is a full revision of the October 13, 2020 Product Stewardship Plan.

Under Environment Code, Chapter 22, Section 2203, Inmar is required to submit a product stewardship plan that describes how the medicine disposal program will satisfy the requirements of the Ordinance to the Environment Department. Once the product stewardship plan is submitted, the Department has 90 days to review and take written public comment before approving or disapproving the plan.

The Director of the Environment Department provides this opportunity for written public comment on the proposed Product Stewardship Plan pursuant to Environment Code, Chapter 22, Section 2211(b).
