Ordinance amending the Environment Code to require audits every 30 months
three years of large refuse generators for compliance with refuse separation requirements;
to establish enforcement measures applicable to large refuse generators found
noncompliant; and affirming the Planning Department’s determination under the
California Environmental Quality Act.

NOTE: Unchanged Code text and uncodified text are in plain Arial font. 
Additions to Codes are in single-underline italics Times New Roman font. 
Deletions to Codes are in strikethrough italics Times New Roman font. 
Board amendment additions are in double-underlined Arial font. 
Board amendment deletions are in strikethrough Arial font. 
Asterisks (* * * *) indicate the omission of unchanged Code subsections or parts of tables.

Be it ordained by the People of the City and County of San Francisco:

Section 1. Environmental Findings.

The Planning Department has determined that the actions contemplated in this ordinance comply with the California Environmental Quality Act (California Public Resources Code Sections 21000 et seq.). Said determination is on file with the Clerk of the Board of Supervisors in File No. 180646 and is incorporated herein by reference. The Board affirms this determination.

Section 2. Findings.

(a) The San Francisco Board of Supervisors adopted the Mandatory Recycling and Composting Ordinance #100-09 that became operative as Chapter 19 of the Environment Code in October 2009. Section 1903 requires that all persons source separate their refuse
into recyclables, compostables and trash, and refrain from mixing those material refuse streams in collection containers designated for another type of refuse. Section 1904 provides requirements for owners and managers of multifamily or commercial properties to provide adequate refuse service and effective source separation, including working with on-site janitors, to achieve compliance with the source separation requirement.

(b) Chapter 19 has led to the provision of adequate refuse service at 99% of San Francisco properties. But the Department of Environment has nevertheless found that 60% of all disposed material from the City is recyclable or compostable. San Francisco must address this gap in waste diversion if it is to achieve its adopted goal of zero waste.

(c) While source separation must improve across all sectors and property types, buildings that generate large amounts of refuse—including multifamily, multi-tenant commercial, and mixed-use properties, and those with roll-off refuse compactors—contribute significantly to refuse contamination, subsequent loss in recovery of recyclables/compostables, and reduced ability to process and market these materials. When audited, large refuse generators are often found to have significant refuse cross-contamination of recyclable and compostable materials in their trash designated for landfill in all three streams: recyclable, compostable, and trash designated for landfill. These large refuse generators face unique compliance challenges, and also present unique regulatory challenges, because contamination is difficult to identify in large-volume refuse containers and in refuse that has been compacted.

(d) At least 85 large commercial or multifamily refuse collection accounts in San Francisco are currently engaging the onsite services of persons or entities known as Zero Waste Facilitators to help sort and manage refuse for proper separation and placement in designated collection containers.
(e) Zero Waste Facilitators have helped these accounts improve compliance with
Chapter 19, achieve refuse rate discounts, and contribute to improved waste diversion/recovery Citywide. A detailed analysis of the results from 9 accounts that employ Zero Waste Facilitators found that on average, these accounts reduced trash service by 66%, increased their recycling and composting by over 150%, increased diversion/recovery by 30%, up to an average 75% diversion/recovery rate, and procured refuse rate discounts resulting in a net cost savings of 25%.

(f) Compliance with San Francisco's source separation mandate requires a sustained commitment and, especially for large refuse generators, a robust source separation system. Many large refuse generators have achieved significant progress in developing and executing such systems through voluntary engagement of Zero Waste Facilitators.

(g) Heightened enforcement aimed at identifying compliance problems for large refuse generators, coupled with a mandate to dedicate resources to sustainable solutions to these problems, is critical to a zero-waste San Francisco.

---

Section 3. The Environment Code is hereby amended by revising Section 1902, as follows:

(a) Each subsection letter accompanying each defined term in Section 1902 (i.e., subsection letters (a)-(z)) is deleted.

(b) The following definitions of terms are added to Section 1902 and placed therein among the defined terms in correct alphabetical position:

"Audit" means a thorough and systematic visual inspection of the contents of refuse collection container(s) upon their removal from the container which may be conducted through analysis of representative sample(s) that results a finding of the approximate percentages of contaminants or materials not appropriate for that type of container (i.e., recyclables, compostables, or trash).
“Large Refuse Generator” means a commercial property refuse account holder, or a City-owned and operated facility in the City, that has roll-off compactor service or generates 3040 cubic yards or more of uncompacted refuse per week. Where a roll-off or other compactor is used, the volume of compacted refuse shall be multiplied times three to account for its compaction.

“Zero Waste Facilitator” means a person(s) or entity serving exclusively in the business of and with demonstrated capacity to manage refuse materials within a given property, including material sorting and transformation, and who meets criteria as may be specified in regulations promulgated by the Director, to achieve proper refuse source separation in compliance with this Chapter 19.

“100% Affordable Housing Project” means a building where 100% of the residential units (not including a manager’s unit or ancillary commercial use) is subject to a recorded regulatory restriction to ensure affordability based on income, or where 100% of the residential units (not including a manager’s unit or ancillary commercial use) are funded by a nonprofit charitable organization and provide permanent housing for Homeless or formerly Homeless persons.

“Non-Profit Food Provider” means a non-profit food hall, food bank, or food pantry, whose primary purpose is to store and/or provide food or meals for indigent persons at no cost or at a subsidized cost.

(c) The following definitions in Section 1902 are amended as follows:

"Public Trash Container" means any trash receptacle installed by a public agency at a public sidewalk, park or other public area and that is not under the control, unless otherwise required by this Chapter, of a multifamily private or commercial property, food vendor or event manager; or any trash receptacle placed or managed by a private entity, including a business improvement district or community benefit district authorized by the City, and located on a sidewalk, park or other public area, including areas designated as dedicated public access by Supervisors Safai; Tang, Ronen, Brown BOARD OF SUPERVISORS Page 4
the San Francisco Bay Conservation and Development Commission, provided, however, that
materials disposed by the general public in such receptacles are not co-mingled
with refuse generated by any other generator.

Section 3. The Environment Code is hereby amended by revising Sections 1906, 1908, and 1909, and 1910 to read as follows:

SEC. 1906. REQUIREMENTS FOR REFUSE COLLECTORS, TRANSFER STATIONS, AND PROCESSING FACILITIES.

(a) All collectors must appropriately designate the collection containers they provide to customers for source separation of recyclables, compostables, and trash. The containers must:

(1) Bear appropriate signage that allows users to clearly and easily identify which containers to use for recyclables, compostables, or trash;

(2) Be color-coded: blue for recyclables, green for compostables, and black for trash; and,

(3) Bear the name of the collector to whom the container belongs.

(b) (1) If a collector finds materials that are not the correct type as designated for that container, such as recyclables or compostables in a trash container, or trash in a compostables or recyclables container, the collector then must leave a tag on the container identifying the incorrect materials.

(2) If the collector continues to find incorrect materials in a collection container after the collector has left a previous tag for that customer and that type of container, the collector must leave another tag on the container identifying the incorrect materials and send a written notice to the person who subscribes for that collection service.
(3) If the collector continues to find incorrect materials in a collection container after the collector has already left two or more tags for that customer and that type of container, the collector may refuse to empty the container, subject to California Code of Regulations Title 14, Section 17331, or as determined by the Director of Public Health or his or her designee. If the container is not emptied, the collector must leave a tag and send a written notice to the person who subscribes for the collection service, identifying the incorrect materials and describing what action must be taken for the materials to be collected; provided, however, that a collector may not refuse on this basis to empty containers from multifamily or commercial properties with multiple tenants and joint account collection service.

(4) The collector shall, upon request, provide to the Director a list of the names and addresses of those persons who have received tags or notices or whose containers have not been emptied due to non-compliance with this Chapter 19, or copies of the tags or notices issued by the collector. The collector shall also provide to the Director, upon request, a list of the names, addresses, and service levels of the collector’s customers and any additional information required by the Director.

(c) Periodic Large Refuse Generator Audits. The Director or collector shall complete an Audit of every Large Refuse Generator for compliance with this Chapter 19 not less than once every thirty months/three years. City departments that are Large Refuse Generators shall be subject to Audits in the months from July through January only.

(d) Audit Findings. The Director shall find that a Large Refuse Generator is out of compliance with this Chapter 19 pursuant to an Audit of the contents of its collector-serviced refuse collection containers, if materials are found that do not belong in a designated collection container and are at a contamination level that either significantly impacts the ability to process and market the materials, or results in the significant loss of compostables or recyclables found in a collection container. The report for each failed audit shall include photographs of the contamination and a
A description of how the contamination exceeds the Director's compliance threshold. The report may identify commercial tenant(s) whom Audit findings suggest are responsible for or have contributed to the contamination resulting in a Large Refuse Generator's noncompliance with this Chapter. Guidelines for the contamination threshold for Large Refuse Generators' compliance with this Chapter 19 shall be set and maintained by the Director based on market conditions and processing capabilities, and as needed to meet the City's progress toward zero-waste benchmarks. The Director shall review and revise these guidelines on an annual or more frequent basis as needed and not more than once per year in furtherance of the objectives of this Chapter.

(e) Notice of Noncompliance and Order to Comply. Upon a finding of noncompliance under Sec. 1906(d), the Director shall promptly issue to the Large Refuse Generator a notice of noncompliance and order to comply ("notice and order").

(1) The notice and order shall state the provision(s) of this Chapter 19 with which the Large Refuse Generator has failed to comply, the specific Audit findings underlying this determination, and contact information for communications required by this Chapter. The notice and order shall also include a copy of the relevant provisions of this Chapter and related regulations.

(2) The notice and order shall state the requirements and 4560-day deadline in Section 1906(f), and prescribe an adequate capacity of Zero Waste Facilitator(s) based on the Audit findings and in accordance with regulations. Where the Large Refuse Generator already has Zero Waste Facilitator(s) at the time it is found out of compliance, and the Director has determined that these Zero Waste Facilitator(s) are engaged at a capacity commensurate with the Large Refuse Generator's volume of refuse regularly produced, the Director may in his or her lawful discretion find that additional Zero Waste
Facilitator(s) are not necessary to correct the cause of the Audit failure, and order other remedial measures that he or she deems appropriate to correct the violation.

(3) The notice and order may also mandate additional remedial steps and a timeline for response and/or compliance as the Director deems appropriate, in his or her lawful discretion and in furtherance of the objectives of this Chapter 19. The Director may make use of any relevant information or evidence, including information provided by the Collector, to determine the required remedial steps. In a notice and order issued to a 100% Affordable Housing Project, or a Non-Profit Food Provider, a non-profit wholesale food provider, or a business whose primary source of revenue is the sale of fresh cut flowers, the Director shall state that such an entity may seek a waiver of an order to engage Zero Waste Facilitator(s) based on its demonstrated lack of ability to afford associated costs without incurring significant hardship. The Director’s order shall prescribe a timeline according to which a 100% Affordable Housing Project must submit in writing to the Director its waiver request and supporting documentation. The Director shall respond within 15 days of receiving such a request.

(f) Zero Waste Facilitator Requirement. A Large Refuse Generator who fails an Audit under Section 1906(c) must, except as otherwise noted in this Chapter 19, within 4560 days of receipt of a Director’s notice and order, and for a duration of a minimum of 24 consecutive months, designate staff or otherwise engage person(s) whose exclusive function is to serve as Zero Waste Facilitator(s). 100% Affordable Housing Projects, Non-Profit Food Providers, businesses whose primary source of revenue is the sale of fresh cut flowers, and non-profit wholesale food providers, shall receive a Director’s notice and order affording 6 months to remedy the noticed violations in accordance with any prescribed remedial measures, after which time the Large Refuse Generator shall be subject to a follow-up Audit. Upon failure of this follow-up Audit, a Large Refuse Generator shall within 60 days of receipt of a Director’s notice and order, and for a
duration of a minimum of 24 consecutive months, designate staff or otherwise engage
person(s) whose exclusive function is to serve as Zero Waste Facilitator(s).

Such person(s) Zero Waste Facilitator(s) must meet minimum criteria, and be engaged at
sufficient capacity to address the Audit findings, in accordance with regulations promulgated by the
Director and as specified in the Director’s notice and order. Upon receipt of a notice and
order, a Large Refuse Generator must notify the Director in writing by the 45 within 60 days
deadline of its plan for compliance, and include supporting documentation where applicable, as
described in regulations. The Director may afford an additional 60 days for Large Refuse
Generators other than City departments to engage Zero Waste Facilitator(s), based on
demonstrated limited availability of Zero Waste Facilitator(s). The Director may afford an
extension longer than 60 days to City departments based on the departments’ need to seek
budget authorization, provided that any department seeking such an extension provides the
Director with a written explanation of the need for additional budgetary authority and the
anticipated steps and timeline for seeking that authority. Upon receiving the required budget
authorization, the City department shall update the Director regarding its timeline for promptly
engaging a Zero Waste Facilitator. The Director may afford a 100% Affordable Housing
Project or a Non-Profit Food Provider, a non-profit wholesale food provider, or a business
whose primary source of revenue is the sale of fresh cut flowers, up to an additional 365 days
to engage Zero Waste Facilitator(s) after such an entity’s first Audit failure following
enactment of the ordinance in Board File No. 180646. The Large Refuse Generator shall be
subject to a follow-up Audit upon expiry of the 24-month period if no earlier compliance Audit is
conducted. The Director or collector shall conduct inspections, monitor compliance with the notice
and order, and pursue enforcement in the intervening period, as permitted under this Chapter 19.

(g) Compliance Audits. Notwithstanding the 24-month requirement described in Section
1906(f), after 12 consecutive months of compliance with all aspects of a notice and order issued under
Section 1906(e), a Large Refuse Generator may request a follow-up Audit to demonstrate compliance. Such compliance Audits shall be conducted at the Large Refuse Generator's own expense. A Large Refuse Generator that has failed its most recent Audit must provide sufficient evidence of remediation efforts alongside a request for a compliance Audit. Provided these requirements are met, the Director or collector shall complete a requested compliance Audit within a reasonable time frame. No Large Refuse Generator is entitled to more than three Audits per collection container in a single 365-day period. Where the Large Refuse Generator passes a compliance Audit and has implemented mandated remedial measures, the Director shall issue an order finding compliance and resolving the underlying notice and order. Where the Large Refuse Generator fails a compliance Audit, the Director may order additional remedial measures and/or administrative penalties in accordance with Section 1906(h).

(h) Enforcement of Notices of Noncompliance and Orders to Comply, and Audit Failure.

The Director may impose an administrative penalty of up to $1000 for each violation of any aspect of a Director's order issued to a Large Refuse Generator under this Chapter 19. Each day of continued noncompliance may constitute a separate violation. The Director may hold such imposed administrative penalties in abeyance, pending completion of ordered remedial steps or based on other conditions, in accordance with his or her lawful discretion and in furtherance of the objectives of this Chapter 19. A Large Refuse Generator that is a City-owned or operated facility is not subject to administrative penalties under this Section 1906(h).

(i) Within 90 days of the end of each calendar year, each collector must submit to the Department, on a form specified by the Director, an annual report of all tons collected by material type and to whom the material was sent.

(j) Upon one year from the operative date of this ordinance the ordinance in Board File No. 180646 and annually thereafter, the Director shall report to the Board of Supervisors on notices and orders issued to Large Refuse Generators under this Chapter 19 within the prior 12-month period. No more than 39 months after the ordinance in Board File No. 180646 becomes operative, the
Director shall submit a report to the Board of Supervisors regarding its implementation to date, and may include recommended amendments to the ordinance as he or she may deem appropriate.

No person may deliver recyclables or compostables, including those mixed with trash, to a landfill or transfer station for the purpose of having those materials landfilled, except as follows:

(1) A collector may drop off recyclables or compostables at the San Francisco transfer station for landfill if the transfer station has agreed to provide to the Director, upon request, audits of collection vehicles for a specified period going forward in time. The transfer station’s audit shall report the quantity of recyclables or compostables, stated as estimated tons per load or as a percentage of the loads, deposited at the transfer station by collection vehicles specifically identified in the request over a reasonable period of time occurring after the request.

(2) A processing facility that sorts and reconstitutes recyclables for the purpose of using the altered form in the manufacture of a new product or turns compostables into usable and marketable compost (e.g., soil-conditioning) material may send to a landfill a minor portion of those materials that constitutes unmarketable processing residuals, if the processing facility provides to the Director, upon request, audits of specific collection vehicles for a specific period going forward in time, of the quantities of recyclables or compostables sent to the landfill from the processing facility.

No person may deliver trash from the city, including trash mixed with recyclables or compostables, to a processing facility, unless the processing facility has agreed to provide to the Director, upon request, audits of collection vehicles for a specified period going forward in time. The processing facility's audit shall report the quantity of trash, stated as estimated tons per load or as a percentage of the loads, deposited at the processing facility by collection vehicles specifically identified in the request over a reasonable period going forward in time.
vehicles specifically identified in the request over a reasonable period of time occurring after
the request.

(m) The operative date for the ordinance in Board File No. 180646 shall be July 1, 2019, except for the following entitiestypes of Large Refuse Generators, for whom this
ordinance shall become operative on July 1, 2021: (1) Large Refuse Generators that are
100% Affordable Housing Projects, and (2) Large Refuse Generators those that are or
encompass Non-Profit Food Providers, (3) businesses whose primary source of revenue is
the sale of fresh cut flowers, and (4) non-profit wholesale food providers.

SEC. 1908. ENFORCEMENT.
(a) The Director and his or her designee may administer all provisions of this Chapter and enforce those provisions by any lawful means available for such purpose, including through imposition of administrative penalties for violations of those provisions of this Chapter, or of rules and regulations adopted pursuant to this Chapter, except as otherwise provided in this Chapter.
(b) To the extent permitted by law, the Director and collectors may inspect any collection container, collection vehicle load, or receiving facility, including back-of-house facilities, and the Director may also inspect internal facilities, front-of-house bins, or refuse chute rooms, for collected trash, recyclables, or compostables, and proper separation thereof, to enforce this Chapter.
(c) Except as otherwise provided in this Chapter, the Director of the Department of Public Health or his or her designee may impose administrative fines for violations of those provisions of this Chapter, or of rules and regulations adopted pursuant to this Chapter, that pertain to the jurisdiction of the Department of Public Health.
(d) Except as otherwise provided in this Chapter 19, the Director of Public Works or his or her designee may imposing administrative fines for violations of provisions of this Chapter, or of any rule or regulation adopted pursuant to this Chapter, that pertain to the jurisdiction of the Department of Public Works.

(e) San Francisco Administrative Code Chapter 100, "Procedures Governing the Imposition of Administrative Fines," as amended, is hereby incorporated in its entirety and shall govern the imposition, enforcement, collection, and review of administrative citations and penalties issued to enforce this Chapter 19 and any rule or regulation adopted pursuant to this Chapter; provided, however, that:

1. The Director of Public Works or the Director of Public Health may adopt regulations providing for lesser penalty amounts than those provided in Administrative Code Section 100.5;
2. The fine for any violation at a dwelling or commercial property that generates less than one cubic yard of refuse per week may not initially exceed $100; and
3. The Director may impose administrative penalties as set forth in Section 1906(h).

No person who is the owner, tenant, manager, employee, contractor, or visitor of a multifamily or of a multi-tenant commercial property shall be subject to fines or penalties for violation of Section 1903 but will remain subject to such enforcement for violations of Section 1904 and other sections of the Ordinance, unless and until the Director of the Department of the Environment has adopted specific regulations setting out the liability of such persons. The Director shall not adopt such regulations prior to July 1, 2011.

(f) The City Department shall use administrative penalties collected under this Chapter 19, including recovery of enforcement costs, to fund implementation and enforcement of this Chapter. Remedies under this Chapter are in addition to and do not supersede or limit any and all other remedies, civil or criminal.

Supervisors Safai; Tang, Ronen, Brown
BOARD OF SUPERVISORS
SEC. 1909. FORMS, REGULATIONS AND GUIDELINES.

(a) After public notice and a public hearing, the Director may adopt necessary forms, and regulations, and guidelines to implement this Chapter.

(b) The Department shall provide assistance regarding compliance with this Chapter.

(c) The Department shall provide information on its website regarding what materials are accepted as recyclables, compostables, and trash under this Chapter.

SEC. 1910. EXCEPTIONS

(a) A property owner or manager may seek a waiver from the Director of all or portions of this Chapter, if the applicant submits documentation, using a form specified by the Director and including a signed affidavit under penalty of perjury, that shows that the property does not have adequate storage space for containers for recyclables, compostables or trash. In cases where after on-site verification space limitations are determined to exist, the Director shall evaluate the feasibility of sharing containers for recyclables, compostables or trash with contiguous properties, and, where feasible, requiring container sharing in lieu of providing a waiver.

(b) Except as otherwise required by the Director, a City agency or any person, property owner or manager, or business or community improvement district, may collect gather trash, compostables, and recyclables that have been placed in public trash containers within its authorized area, and/or refuse directly from the ground on a sidewalk, street, or park within its authorized area, and may place the items in collection containers designated exclusively for public trash that are serviced by the collector, and/or a collector may drop-off compostables or recyclables so gathered at the San Francisco transfer station that have been collected from public trash containers, so long as the items have not been co-mingled with refuse from any other source, including refuse generated by the serviced entity.
itself. A collector may drop off compostables or recyclables at the San Francisco transfer station that have been collected from public trash containers. The Director may require public trash containers to have a recyclables receptacle attached.

Section 4. Effective and Operative Dates.

(a) Except where otherwise specifically noted, this ordinance shall become effective 30 days after enactment. Enactment occurs when the Mayor signs the ordinance, the Mayor returns the ordinance unsigned or does not sign the ordinance within ten days of receiving it, or the Board of Supervisors overrides the Mayor’s veto of the ordinance.

(b) This ordinance shall become operative on January 1, 2019.

Section 5. Scope of Ordinance. Except as stated in Section 2, in enacting this ordinance, the Board of Supervisors intends to amend only those words, phrases, paragraphs, subsections, sections, articles, numbers, punctuation marks, charts, diagrams, or any other constituent parts of the Municipal Code that are explicitly shown in this ordinance as additions, deletions, Board amendment additions, and Board amendment deletions in accordance with the “Note” that appears under the official title of the ordinance.
